

## Perfecting hybrid working:

# Smart offices

Moving to hybrid working offers you the opportunity to downsize your premises and reduce overheads. But how should you manage the space you do have? How do you administer desks and meeting spaces? And most importantly, with people coming and going, how do you stay secure? Our suite of Apple-driven services are designed to enable flexible and hybrid working without compromising your space.

### Controlling your space has never been simpler

Apple devices are designed to be intuitive, and because they're popular with consumers most people already know how to use them. That makes them the perfect devices for sign-in systems and room controls: you don't need any to invest in training or a technician, and ease of use equals higher adoption rates.

iPad is also incredibly versatile: photos, biometric sign in, ID card scans and badge printing are all supported natively by iPad or can be achieved simply through affordable hardware additions. And there's no need to worry about staff misusing hardware, as you can lock users into one app, disable online connectivity and more to protect public-facing devices.

### Hotdesking made fuss-free

Once you've made it into the building, use your Apple devices to deliver seamless hotdesking. Powerful, portable and easy to connect wirelessly to screens, keyboards and other accessories, Apple's devices are great for mobile workers or as part of a desk booking system. We can develop solutions that show free desks, manage bookings, scheduling desk cleaning and more – whatever your business needs.

### Make sure your space still works for you

Not sure how your rooms are being used anymore? Our usage tracking solutions can monitor when and how rooms are being used in order to give you actionable data. Do you need meeting rooms for large groups or several smaller ones? Are your booked spaces actually going unused? We can help you discover how your users work, so you can tailor your space to them and get the most out of your property.

### What we offer:

- **Smart solutions for desk and room booking** Simplify booking, scheduling and orders.
- **Usage monitoring** Discover how your space is being used, and find solutions to match.
- **Electronic sign-in systems** Improve security with a single, unified system.
- **Hotdesking solutions** Manage availability, cleaning, booking and more.

Hybrid working's here to stay. Is your office smart enough to keep up? Find out by calling **03332 409 321** or emailing [solutions@jigsaw24.com](mailto:solutions@jigsaw24.com).
